# GENICS

Welcome to the future of molecular data-driven farm health management; delivered alongside custom consultancy and actionable insights.

Genics Microbiome Health Report gives you the answers you need, providing:

- Probiotic Validation
- *Vibrio* spp. Profile
- Water Sanitation System Health Check
- Bacterial Culture Concordance

## Microbiome Health Report

01

### Probiotic Validation

Is your probiotic strain working hard for your money? Genics Microbiome Health Report confirms probiotic strain persistence in your aquaculture system. This allows you to optimise your protocols for better returns, ensuring you get the most out of your probiotic investment.

02

### *Vibrio* spp. Profile

Focussing on usual suspect bacterial pathogen genera at the species level, rather than just grouping bacteria, is crucial when dealing with *Vibrio* spp. Genics Microbiome Health Report identifies specific *Vibrio* sp. within your system to powerup your health response and prevent costly disruptions.

03

### Water Sanitation System Health Check

Begin your grow-out phase with water that's well-prepared and hygienic for production confidence. We assist in enhancing water health by refining your sanitation protocols, ensuring a balanced and healthy microbial environment.

04

### Bacterial Culture Concordance

If you're struggling with confusing results from bacterial plating, Genics Microbiome Health Report provides clear actionable bacterial profile data.
